Enabling Holistic Digital Progression

Digital transformation is and will continue to be one of the most significant contemporary drivers of business change in modern society. Absolutely every kind of firm, institution, Government agency and non-profit organisation in the coming decade will have to figure out how to facilitate their customers (and to a great extent too their employees and shareholders) on-line. INFOCOMM Technologies is your partner on this exciting journey.

“ Innovative network applications from The INFOCOMM Technologies Ltd. have empowered our instiution to move with the times. ”

AMIT PARIAG; SECRETARY; DENTAL COUNCIL OF TRINIDAD AND TOBAGO

NETWORKING AND SECURITY

Through our comprehensive Netork and Security Audits, we give advice for inserting best practice thinking, frameworks and methodologies into an organisation's network operations, and we set the organisation with a solid ICT infrastructure platform and on a course to achieving operational excellence and a competitive advantage in the marketplace..

MOBILE AND PAYMENT SOULTIONS

In the digital age, citizens and businesses expect the convenience of submitting payments on-line from any device.

Our services include online payment, mobile apps and revenue tracking modules which enable a suite of analytic tools to determine revenue by service or fee type, unverified payments, payments by location, etc

CLOUD SERVICES

Imagine a secure cloud environment where Government and business teams can configure and design e-services in days (rather than months), then build, manage, and release applications to the public (or internal publics) with a radically shortened path to stakeholder impact. This is the INFOCOMM Technologies Cloud Services Platform Platform.

CONSULTING

Our consulting services include e-Readiness assessments, visioning, process mapping / re-engineering, employee technology awareness, training and change management support. We also offer technical assistance with regard to data scrubbing, data architecture, technology and project governance – which we believe are all key to optimising project success.

Integrated Technology For The Business Minded

IINFOCOMM Technologies (ICT) Ltd. is a technology strategy and consulting firm that was set up in 2009 to provide strategic advice, training, technical know-how and support to Regional governments, private institutions, telecommunications authorities and NGO's. We are recognized regionally and sought after as a valuable resource on ICT policy, ICT strategies, technology training and deployment of strategic ICT solutions.

As a company we nudge our clients toward excellence by helping them to access, understand and successfully deploy the latest ICT tools, strategies and training needed to achieve sustained competitive advantage. Our interventions enable more effective decision-making, increased innovation capacity, enhanced internal efficiency, access to new markets and increased return on investment.
